This label sheet has 16 labels which can be installed in the label holders on the front side of the AMP NETCONNECT* patch panels. You can prepare and print labels in the following ways:

AMP NETCONNECT Software**

Download software from the Silver Fox® website at:
www.silfox.com/store/amp-netconnect

- Start a new job
- Select template called 1116030-1
- Enter your information into the segment, you can:
  - Type it
  - Use the sequence tool or
  - Copy and paste from any windows application.
- Click finish
- Print through either laser or inkjet printer
- Feed the label sheet through the printer in the feed direction indicated.
- After printing, fold then tear the label sheet apart at the perforations
- Install them into the label holders located at the front of the patch panel.

Microsoft® Word for Windows or an equivalent label printing program.

- Use the Envelopes and Labels tool of Microsoft Word®
- Enter the dimensions indicated to set up the labels for printing.
- Divide the label into the number of ports
- Type in the information for every port. Note that the 9th row down is not a printable label area.
- For best fit of information an 8 point size is recommended (this will also depend on the number of characters on each label).
- Feed the label sheet through the printer in the feed direction indicated.
- After printing, fold then tear the label sheet apart at the perforations
- Install them into the label holders located at the front of the patch panel
