

TE Connectivity's DEUTSCH Autosport 2015-2016 FIA Formula-E Championship

TE Connectivity (TE) Partners with Andretti Technologies...

We're using the FIA Formula-E championships as a technology incubation and advanced engineering development platform for harsh environment interconnect applications in multiple industries & markets.

TE Extends Its Leadership in the Global Autosport arena...

With Products designed and manufactured to withstand harsh conditions found in competitive motorsport. TE serves this market with its **DEUTSCH** Autosport connectors, **TE** sensors and **Raychem** wire and cable. Products that perform reliably in the extreme conditions that motorsports demand.

The groundbreaking partnership with Andretti Technologies will leverage TE's design and development expertise in a test bed environment that Formula E racing is well suited to provide.

Driving Green... The partnership is expected to accelerate development in several areas including the battery, electric motor, inverter and chassis systems to prove and promote clean energy and sustainability in harsh environments.

TE and Andretti Autosport Perform on the Global Formula E Stage...

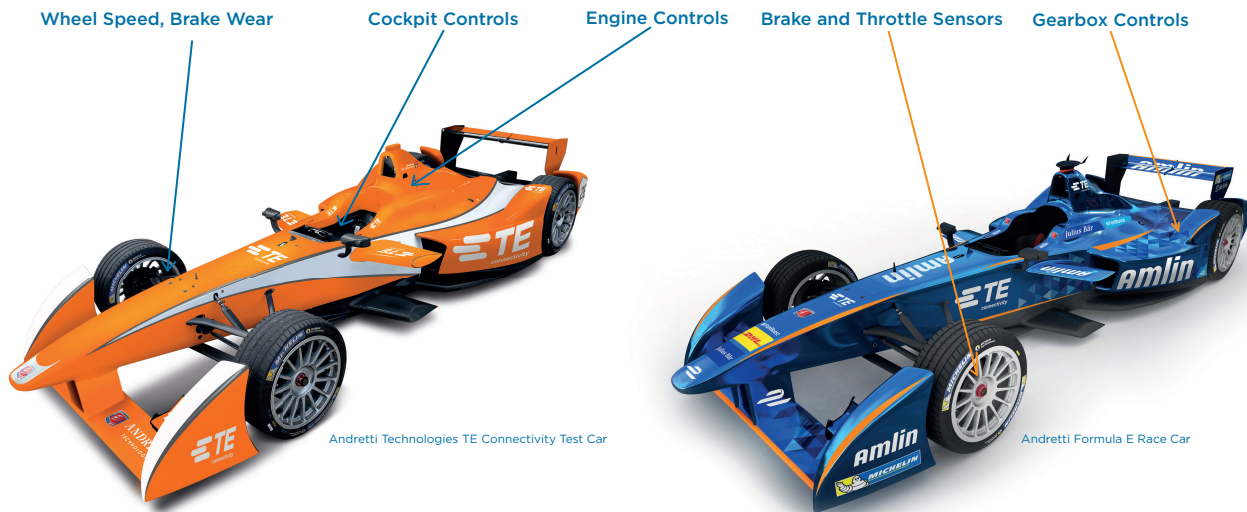

Andretti Technologies' test cars for Formula E competition will feature the global brand colors of TE Connectivity.
