

Cosmic 927R and 927RX Micro-Cable Strippers

Fast Facts

- For most wire types, optimized to maximize stripping quality
- Can be selected to twist with clockwise/counterclockwise or non-twist
- Power supply: 100 - 240 VAC
- Digital display for wire diameter
- Can be set to a wide variety of functions
- Compact, lightweight, benchtop
- **Sold and distributed only in North America**

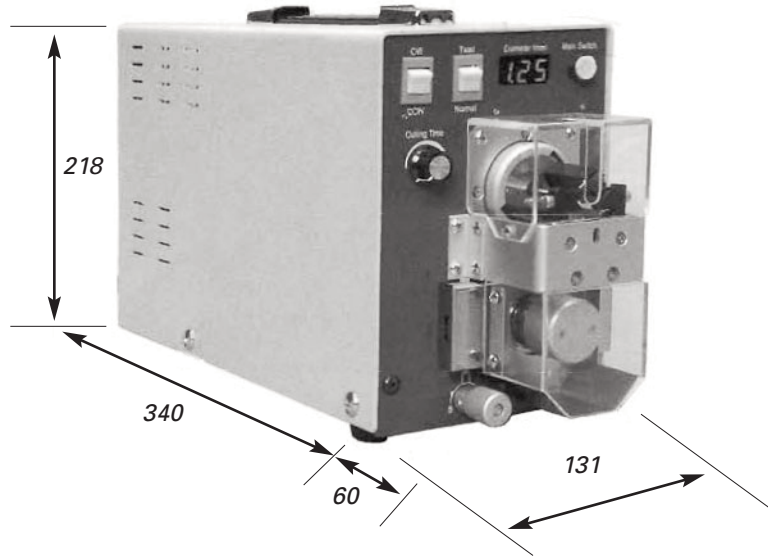

Ultramodern technology has been developed into a precision micro-cable stripping machine

The demand for a precision cable stripper that can handle various wire insulation materials such as small and compact electronic devices and communication equipment has been met. The **Cosmic 927R** was designed and developed to reliably strip various insulation materials and micro-cable. From conductor diameter 36 AWG to 10 AWG (0.11mm to 3.5mm), the stripping diameter display can be set to within 0.1mm increments. Thus optimal stripping quality is guaranteed and damage to the conductor is eliminated.

The **Cosmic 927RX** shares the features of the Cosmic 927R but is recommended for hard to strip insulations

Description	Part Number
Cosmic 927R Benchtop Stripper	2047789-1
Spare Blade Set for 927	9-547951-2
Cosmic 927RX Benchtop Stripper	2047790-1
Spare Blade Set for 927RX	2047836-8
Gripper Set	1-509805-8
Foot Pedal	547217-4

Cosmic 927R and 927RX Micro-Cable Strippers

Partial Strip Indicator

Technical Specifications

Workable Wire Sections:	36 - 10 AWG
Stripping Length:	1.0 - 25.0mm (Stripping length for 927RX is 1.5-25mm)
Partial Stripping Length:	Min. 1.0mm
Insulation Material:	Teflon, Rubber, PVC, etc.
Machine Cycle:	Max. 1.5 sec.
Blade Material:	Tool steel / Carbide (optional)
Electrical Requirement:	AC 100V - 240V / 60VA
Net Weight:	8 kg
Part Number:	1-528837-3

(Specifications subject to change without notice)

Special Function

Twist or non-twist

Stripping head rotation direction

Rotation time

Optional

Foot switch
