

D E S C R I P T I O NPRODUCT COVERED:

Hermetic Cluster Block Connectors, Part Nos. 926473, 926046, 925893, 925892.

MARKING:

\* The molded bodies are marked with the part no. and AMP.

ELECTRICAL SPACINGS:

Not less than 3/64 in through air and over surface of insulation from bare live parts to:

- A. Bare live parts of opposite polarity.
- B. Isolated metal parts.

ENGINEERING CONSIDERATIONS (NOT FOR INSPECTOR USE):

These are components intended for use on equipment where the acceptability of the combination has been determined by Underwriters Laboratories Inc.

The following should be determined in judging the acceptability of the combination.

1. The lead wire material which is supplied by the end manufacturer is suitable for the end-use application.
2. The lead wires are suitably attached to the receptacle connector.
3. The molded body material should not exceed 75°C in the end use application.
