## 250 Series, Over/Undervoltage

Product Facts
■ Function 27/59
■ ANSI/IEEE C37.90-1978

The 250 series relays provide combined Overvoltage and Undervoltage protection in a single compact unit.
Models are available for single phase or three phase applications, and are suitable for either 50 Hz , 60 Hz , or 400 Hz operation. The trip point is adjustable.
A transistorized circuit provides a sharp and accurate response at the preset tripping voltage; unaffected by temperature or frequency variations.

Note: Dimensions in inches. Multiply values by 25.4 for dimensions in mm .

## Ordering Information

## Product Specifications

Nominal Voltage - See Ordering
Information
Undervoltage Trip - $70-100 \%$ of nominal voltage, screwdriver adjustable
Overvoltage Trip - $100-125 \%$ of nominal voltage, screwdriver adjustable
Pick-up to Drop-out Differential 3\% maximum
Contact Ratings - 5 amp resistive at 120 VAC or 28 VDC
Contact Form — One set N.O., one set N.C.
Operating Temperature Range -$-20^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$

## Notes:

1. Remove screws for access the overvoltage or undervoltage trip adjustments. Clockwise rotation of the adjustment potentiometer will raise the trip point.

## Contact Arrangements

NC - Open at nominal voltage. Closed at Overvoltage and Undervoltage
NO - Closed at nominal voltage. Open at Overvoltage and Undervoltage

Consult factory for additional models.
