

NEMA TERMINAL BLOCKS

BUCHANAN Terminal Blocks

Buchanan NEMA Terminal Blocks offer a wide range of quality features and configurations to solve virtually any wiring need. Buchanan Terminal Blocks make wiring jobs simpler and easier, as they provide a ready hook-up of wires from different components or from different areas throughout a structure.

Product Facts

- High circuit density - 183 circuits per 6-foot length, 3/8 inch pitch.
- Choice of 4 contact styles - tubular clamp, tubular screw, strap screw, quick connect.
- Readily identify circuits - mark directly on block sections or use removable marking strip. Preprinted marking strips also available.
- Rated up to 50 amperes per circuit.
- Flat base models mount directly to surfaces or on miniature channel. Dovetail base mounts on standard size channel.
- Packaged for rapid handling and assembly - 100 per carton.
- Only one end section needed per block assembly.
- Fanning strips - interlocking sectional fanning strips allow entire circuit groups to be connected and disconnected as a single unit.
- Factory assembled blocks available, including marking strips and different contact sections.

NEMA 900 Series is available in .375" [9.53] centerline, in direct or channel mount, tubular or strap versions, and screw, clamp or quick connect configurations. Corrosion-resistant versions are also available.

Note: All part numbers are RoHS Compliant.

Dimensions are in millimeters and inches unless otherwise specified

Product Facts

- Choose from 5 different contact styles.
- 600 volt UL and NEMA rating.
- Conservatively rated from 50 to 90 amperes per circuit, depending on which contact style is selected.
- Choose any of three mounting methods — two-way flat base models surface mount directly to the panel or snap-on miniature channel. Dovetail base models mount on standard channel.
- Packaged for rapid handling and assembly — snap-fit sections are packed 10 per carton.
- Only one end section needed per block assembly.
- Readily identify circuits — mark directly on block sections or use removable marking strip. Pre-printed strips are also available.

This compact, heavy duty block line accepts single or combination wires up to #4 AWG, solid or stranded. The compact design allows at least 138 circuits per 6-foot length to be mounted. The pitch of this 600 volt block is 0.50" [12.70] (centerline spacing).

Note: All part numbers are RoHS Compliant.

Dimensions are in millimeters and inches unless otherwise specified

Material & Finish

Voltage Rating: Blocks meet 600 volt creepage and clearance requirements of NEMA, UL and CSA for general industrial control equipment and panelboards. Withstand voltages greatly in excess of IEEE switchgear standards for 750 volts.

Ampacity: For a single #4 AWG wire the maximum amperage recommended is 85 amps.

Standard Contacts:

Material: Electrical grade copper or copper alloy conductor. Steel Screws plated to resist corrosion in most industrial applications

AL-CU Tubular Screw: Aluminum compatibility with aluminum or copper conductors. AL-CU is tin-plated brass.

Nylon Housing:

Material—Nylon; Unfilled Type 6/6

Max. Continuous Temperature—125°C [257°F]

Breakdown Voltage (AC, 60 Hz)—

Contact-to-Contact: 7000V

Contact-to-Ground: 7800V

Dielectric Strength (RH 40% at Sea Level)—470-385 Volts/mil thickness Per ASTM D149

UL High Voltage Arc Tracking (inches/min.)—.01-.35

Water Absorption (24 hrs. % wt. gain)—1.5%

Flammability—UL94V-2

Chemical Resistance—Resistant to aromatic hydrocarbons, strong alkalis Per ASTM D543

Radiation Resistance (ergs g-1 (C))—8 x 10⁷

Color—Translucent White

Product Facts

- **Sturdy Heavy Duty block** accepts single or combinations of wire up to #4 AWG solid or stranded — at least 122 circuits per 6-foot length, 9/16" center-to-center spacing.
- **Choose from four different contact styles** conservatively rated up to 90 amperes.
- **600 volt UL and NEMA rating.**
- **Surface mounted flat base and channel mounted dovetail base models available.**
- **Only one end section needed per block assembly.**
- **Interlocking sectional fanning strips** allow entire circuit groups to be connected and disconnected as a single unit.
- **Readily identify circuits** — available with painted marking surface or use removable marking strip. Pre-printed strips are also available.
- **Factory assembled blocks available.**
- **Heavy Duty Phenolic Block Sections Snap-fit with 300 & 600 volt, medium duty phenolic, heavy duty nylon and polypropylene, and Fuse and Switch blocks.**

This family of phenolic heavy duty blocks is ideal for high temperature, high current applications. The rugged material withstands temperatures up to 302°F [150°C].

Product Facts

- Two, four, six, eight, and twelve circuit models available — 5/8" [15.88] center-to-center contact spacing.
- No assembly required — each is a single, easily installed unit.
- Three contact styles available — strap screw, captive strap clamp, and moving tubular contact.
- Use wire up to #6 AWG with tubular contact. Strap screw and strap clamp contacts are available for #8 and smaller.
- Withstand voltages in excess of IEEE standards for 750 volts. Meet clearance and creepage spacings specified in UL, CSA, and NEMA Industrial Control Standards for 600 Volts.
- Strap contacts rated at 50 amperes — tubular contact conservatively rated at 70 amperes.
- Pilot point screws supplied with strap screw and clamp contacts — speeds installation time.
- Plain white marking strip supplied with each block — circuits are easily identified.
- Special purpose blocks available—choose from blocks with solder posts, printed circuit board pins, or nuts on screw posts, removable circuit links, and a shorting bar.

Traditionally, these rugged One-Piece Blocks are the standard means of connection for heavy industrial applications like rail transport, utility, and traffic control industries. Ideal for dirty and vibration prone environments.

Circuit identification is greatly simplified with the use of pre-printed strips for BUCHANAN terminal blocks. These hot-stamped strips are available for all snap-assembled sections (except Fuse, Switch, and Circuit Breaker models which are marked individually). The strips can be ordered separately or pre-installed on factory assembled sectional block units.

Unlike painted or screened letters, hot-stamped letters are designed to not rub or flake off during industrial use so that they will retain their legibility.

Marking strips are stamped with consecutive numbers that can be ordered to read from left-to-right or right-to-left, and in vertical or horizontal positions. Number sequences can begin with any number. This allows circuits to be identified in a manner most consistent with the terminal block application.
