

ALUMINUM COMPRESSION NARROW PALM LUGS

Dual Rated Aluminum Crimp Lugs 1 Hole, 2 Holes Lugs

TE Connectivity's (TE), crimp type compression lugs are made from high conductivity aluminum. They are electro-tin plated to resist electrolytic corrosion. They are suitable in applications from 600 V to 35 kV. Compression lugs are available to accommodate a broad range of cable sizes from #1/0 AWG to 1500 kmcil in both copper and aluminum material, in one- or two-hole configurations.

The barrels are chamfered or you can say chamfered for easy entry of the conductor and pre-filled with oxide inhibitor compound to prevent contamination. The long barrel length provides extra contact with the conductor, post crimping. Every barrel cap is color-coded to the proper die for error-free die selection. It prevents the Inhibitor from getting contaminated before installation.

Key Features

- Easy to install with industry standard tooling
- Electro tin-plated for electrolytic corrosion resistance and durability
- Industry standard color coded barrel ends and caps simplify die selection and prevent contamination of Oxide-Inhibiting compound
- For 600 V to 35 kV applications
- Suitable with both aluminum and copper conductors

Aluminum Compression Narrow Palm Lugs
