## Applications

- Portable electronic devices.
- 3C products.
- Smart phones.
- Digital cameras.

## Features

- Compact size.
- Low-profile.
- Long operation life.
- Grounded options available.

LPT Series - Low-Profile Tactile Switches

TE Connectivity is pleased to introduce its LPT Series of Low-Profile Tactile Switches. Given the various combinations of Size and Height measures offered by the LPT Series, these tactile switches are ideal for a wide variety of applications within the portable electronics market.

The Low-Profile Tactile Switches will be characterised by SMT mounting available in Tab, Gull-Winged, and J-Bend terminations.

## LPT Series - Family Classification

| Family | USLPT <br> (Ultra-Mini Size) | MCSLPT <br> (Micro-Mini Size) | MSLPT <br> (Mini Size) |
| :---: | :---: | :---: | :---: |
| Body Size | $2.6 \times 1.6 \mathrm{~mm}$ to <br> $3.7 \times 3.7 \mathrm{~mm}$ | $4.6 \times 4.4 \mathrm{~mm}$ to <br> $4.8 \times 4.8 \mathrm{~mm}$ | $5.2 \times 5.2 \mathrm{~mm}$ |
| Height | 0.35 mm to 0.65 mm | 0.55 mm to 1.05 mm | 0.80 mm to 2.00 mm |
| Mounting | Tab / J-Bend | J-Bend | Gull-Wing / J-Bend |
| Grounding | No | No | Yes |
| Packaging | Tape \& Reel | Tape \& Reel | Tape \& Reel |

Dimensions in
millimetres unless otherwise specified

MCSLPT Family - $4.6 \times 4.4 m m$

|  | Contact Rating | 50mA, 12VDC |
| :---: | :---: | :---: |
|  | Contact Resistance | $100 \mathrm{~m} \Omega$ Max. |
|  | Insulation Resistance | 100M $\Omega$ Min. 500VDC |
|  | Dielectric Strength | 300VAC/1 Minute |
|  | Operating Force | $\begin{aligned} & 100 \pm 50 \operatorname{gf}(-1) / 160 \pm 50 \operatorname{gf}(-2) \\ & 200 \pm 50 \operatorname{gf}(-3) / 260 \pm 50 \operatorname{gf}(-4) \end{aligned}$ |
|  | Travel | 0.20 mm |
|  | Operating Life | $\begin{gathered} 100 \& 160 \mathrm{gf}=1,000,000 \text { Cycles Min. } \\ 200 \text { \& 260gf }=500,000 \text { Cycles Min. } \end{gathered}$ |
|  | Operating Temperature | $-20^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$ |
|  | Storage Temperature | $-30^{\circ} \mathrm{C}$ to $+80^{\circ} \mathrm{C}$ |

## 1. Style

"Tactile Switches" are mainly used as signal switches of electric devices, with the general requirements of mechanical and electrical characteristic.
1.1 Operating Temperature Range: $-20^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$
1.2 Storage Temperature Range: $-30^{\circ} \mathrm{C}$ to $+80^{\circ} \mathrm{C}$
2. Current Range: 50 mA , 12VDC Max.
3. Type of Actuation: Tactile feedback
4. Test Sequence:

|  | Item | Description | Test Conditions | Requirements |
| :---: | :---: | :---: | :---: | :---: |
| Appearance | 1 | Visual Examination | By visual examination check without any out pressure \& testing. | There shall be no defects that affect the serviceability of the product. |
| Electrical Performance | 2 | Contact Resistance | Applying a static load (1.5 to $2 x$ actuating force) to the centre of the actuator. Measurements shall be made with a 1 kHz small current contact resistance meter. | $100 \mathrm{~m} \Omega$ Max. |
|  | 3 | Insulation Resistance | Measurements shall be made following application of 500VDC potential across terminals and cover for 1 minute $\pm 5$ seconds. | 100M 2 Min. |
|  | 4 | Dielectric Withstanding Voltage | $300 \mathrm{VAC}(50 \mathrm{~Hz}$ or 60 Hz ) shall be applied across terminals and cover for 1 minute. | There shall be no breakdown or flashover. |
|  | 5 | Bounce | 3 to 4 operations at a rate of 1 cycles per | 10 m seconds Max. |

## 5. Soldering Conditions:

■ Condition for Soldering MCSLPT Series:

- The condition noted above is the temperature of the copper foil on the surface of the PCB. There are cases where the temperature of the board greatly differs from the surface of the switch. Do not allow the surface temperature of the switch to exceed $260^{\circ} \mathrm{C}$.

## ■ Manual Soldering

Soldering Temperature: $350^{\circ} \mathrm{C}$ Max.
Continuous Soldering Time: 5 second Max.

Dimensions Shown for
reference purposes only.
Specifications subject to change go to: www.te.com/help

- Precautions in Handling

1. Care should be exercised so that flux from the top surface of the printed circuit board does not adhere to the switch.
2. Do not wash the switch.

- Operating precautions

1. Do not actuate the switch with excessive force.
2. Discontinue force after the switch has been actuated so as to avoid deformation of the components of the switch. Deformation of the components may cause the switch to malfunction.
3. Align the plunger with the switch to insure proper operation.

- Notes on storage conditions

Avoid the following as exposure may affect the performance and/or the soldering of the switch:

1. Temperature of -10 to $+40^{\circ} \mathrm{C} \& 85 \%$ humidity.
2. Exposure to corrosive gas.
3. Storage over 6 months
4. Exposure to direct sunlight.
5. Storage conditions should prevent heavy impact or loading.
6. After opening the package, unused switches must be repackaged in a moisture-proof and airtight environment.

Condition for Soldering MCSLPT Series:

■ The condition noted above is the temperature of the copper foil on the surface of the PCB. There are cases where the temperature of the board greatly differs from the surface of the switch. Do not allow the surface temperature of the switch to exceed $260^{\circ} \mathrm{C}$.

■ Manual Soldering
Soldering Temperature: $350^{\circ} \mathrm{C}$ Max.
Continuous Soldering Time: 5 second Max.

- Precautions in Handling

1. Care should be exercised so that flux from the top surface of the printed circuit board does not adhere to the switch.
2. Do not wash the switch.

■ Operating precautions

1. Do not actuate the switch with excessive force.
2. Discontinue force after the switch has been actuated so as to avoid deformation of the components of the switch. Deformation of the components may cause the switch to malfunction.
3. Align the plunger with the switch to insure proper operation.

- Notes on storage conditions

Avoid the following as exposure may affect the performance and/or the soldering of the switch:

1. Temperature of -10 to $+40^{\circ} \mathrm{C} \& 85 \%$ humidity.
2. Exposure to corrosive gas.
3. Storage over 6 months
4. Exposure to direct sunlight.
5. Storage conditions should prevent heavy impact or loading.
6. After opening the package, unused switches must be repackaged in a moisture-proof and airtight environment.
