

M12 Push Pull

The new Push Pull variant makes it easier to deploy M12 system because of the easy assembling process. The Push Pull technology saves time during installation compared to traditional M12 alternatives. The saved time helps with lowering to total applied cost.

IP65/67 protection
System is sealed off as early as possible

Easy Device Integration
Sockets flush to device surface

Blindly Mateable
Locks reliably even without sight contact

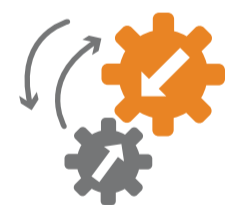

Safe lock
Haptic and acoustic feedback

No tools needed
Locking the push pull connector can be done by hand. This allows a higher density of PCB socket connectors.

Time saving
Locking the connector without twisting saves times. This lowers the total applied costs.

Backwards compatible
Sockets also lock with traditional M12 screw type connectors
