

COLD SHRINK STRAIGHT JOINTS (CSJT) FOR SINGLE AND THREE-CORE POLYMERIC INSULATED CABLES UP TO 52 kV

KEY FEATURES

- Single piece silicone rubber joint, pre-expanded on a well-known and easyto-install holdout system
- High mechanical expansion capability allows a wide application range
- Effective electrical stress control on the screen cut areas by integrated conductive geometrical stress cones
- Mechanical shear bolt connector or compression connector can be supplied with the kit
- Excellent resistance to splitting and permanent set

TE Connectivity's (TE) Raychem CSJT joints offer a fast and easyto-install jointing system to assure and maintain high power network reliability. The joints are designed to cover a wide range of applications and accommodate a variety of cable and conductor types.

The silicon rubber body of CSJT is made of high performance liquid silicone material which is specially formulated for excellent tracking and split resistance.

TE's mechanical connector ensures a reliable connection of different conductor materials in today's network. Its preset shear torque of the bolts and special designed surface ensures the correct contact pressure and effectiveness of electrical connection. All connectors meet the criteria of IEC-61238-1 class A and GB 9327.

TE also provides multiple options for application in harsh environment, such as with TE's Raychem CRSM heat-shrink wraparound to enhance reliability for longer service time under water, or with TE's Raychem RFPT self-adhesive inflaming retarding tape to reinforce fire-resistance capacity, or with fast and easily filled resin outer sealing and protection system to provide effective water and impact resistance.

Customers can count on consistent, high quality products, driven by TE's proven innovation and backed by our extraordinary customer support.

The application range given in the table is based on polymeric insulated cable with stranded circular conductors according to GB 12706.2.3-2008 standard. Due to different conductor shape or dimensions and cable constructions, the minimum and maximum application range may be extendable

Test Reports

The products are type tested in accordance with GB 12706.4-2008 specifications.

APPLICATION RANGE (8.7/15 kV, 12/20 kV, 26/35 kV)		
Part Description	Application Range (mm ²)	Mechanical Connector
BSM-25/95	25 - 95	
BSMB-35/150-K1	35 - 150	
BSMB-95/240-K1	95 - 240	
BSMB-120/300-K1	120 - 300	
BSMB-185/400-K1	185 - 400	
BSMB-500 MK2	500	
BSMB-630 MK2	630
