

COPPER COMPRESSION TERMINAL LUGS

(CSA dies)

TE Connectivity's (TE) compression lug terminal connectors are ideal for secondary distribution and overhead applications up to 35 kV. Copper compression connectors are available to accommodate a range of cable sizes from #6 AWG solid to 3000 kcmil copper. Use for terminating solid, compact, compressed and concentric stranded class B conductors. Compression of the terminal barrel creates a highly reliable connection that enables connector to perform well and at a lower temperature than the conductor during operation.

Connectors meet the requirement of ANSI C119.4, class A electrical and class 3 mechanical.

Key Features

- High conductivity ETP copper alloy
- Heavy wall design
- 1, 2 and 4 holes pad available
- Seamless design on single and double hole terminals
- Scribe line on connector body to identify the cable strip length and the start crimp line
- Tin plated/non plated versions available
- Easy to install using industry standard tools with CSA dies
- Conductor and die sizes marked on each terminal
- Barrel length allows for multiple crimps

TE Connectivity Ltd. is a \$13 billion global technology and manufacturing leader creating a safer, sustainable, productive, and connected future. For more than 75 years, our connectivity and sensor solutions, proven in the harshest environments, have enabled advancements in transportation, industrial applications, medical technology, energy, data communications, and the home. With 78,000 employees, including more than 7,000 engineers, working alongside customers in nearly 150 countries, TE ensures that EVERY CONNECTION COUNTS – www.TE.com.
