

T9A Series, DC Coil 30A PCB or Panel Mount Relay

- 30A switching in 1 form A (NO) and 20A in 1 form C (CO)
- Plastic sealed case available
- Meets UL 508 and 873 spacing 3.18mm through air, 6.36mm over surface
- Option for load connections via 0.250"" (6.35mm) Q.C. terminals
- UL class F insulation system standard

Typical applications HVAC, Appliances, Industrial Controls

Coil Data (continued)

Ambient temperature vs. coil voltage - 1W coil

Data below are average values and should be verified in application. Tests were conducted within a 2' (.6 m) cube (still air); at nominal coil power @ 25°C; with normally open contact loaded; and with 4' (1.22 m) long, #10 AWG load wires. P.C. board relays were mounted to a 30A, single side P.C. board. Coil rise test conducted with a 30A PC board to maintain 20°C max. rize at 30°C. The relay connections and wiring must be designed with an adequate cross section to ensure proper current flow and heat dissipation.

2) Remove knock-off nib after cleaning process for optimum life of wash-tight relays.

Insulation Data Initial dielectric strength 1500V_{rms} between open contacts 1500V_{rms} between contact and coil 2500V_{rms} Initial surge withstand voltage 6kV Initial insulation resistance between insulated elements between insulated elements 1x10⁹Ω Clearance/creepage between contact and coil between contact and coil 3.18mm clearance/6.3638mm
