XFU400

Miniature Load Cell

SPECIFICATIONS

- Range from 0-500 N to 0-5 kN or [100 lbf to 1 klb]
- Tension and Compression
- Low deflection

Available in a range of measurements and a variety of mounting threads, the **XFU400** is easily installed. Its miniature size facilitates testing where space is at a premium.

The sensing element is fitted with a fully temperature compensated Wheatstone bridge equipped with high stability micro-machined silicon strain gages.

The **XFU400** is used in applications that require a spherical plain rod-end bearing and has the capacity of accepting a full scale range of up to 5 kN [1 klb].

With a long standing of experience as a designer and manufacturer of sensors, TE CONNECTIVITY often works with customers to design or customize sensors for specific uses and testing environments.

On request, Instruction documents can be provided to ease the selection and use of our sensors and provide helpful tips.
