4.4.8 Spray test 喷淋试验

PROCEDURE / 测试方法:

- The test method is based on DIN-40050-9. The test condition, test equipment, water flow rate, water pressure, water temperature, test duration time and other verification condition are carried out according to table 8 in the standard..

试验方法参照DIN 40050-9,根据电器盒不同的防水等级的定义进行验证，试验条件、试验设备、水流速率、水压、水温、试验持续时间等验证条件参照标准中的表8进行。

- Measure the voltage drop and Withstanding voltage after the sample return to the room temperature.

待恢复至室温后，测量样品的电压降及进行耐击穿试验。

REQUIREMENTS / 要求:

- After test, there is no water in terminals, connectors, fuses, relays area.
试验后端子、插接器、熔断器、继电器等区域无积水。
- Meet the requirement of voltage drop.
试验后满足电压降的要求。
- Meet the requirement of Withstanding voltage
试验后满足耐击穿的要求。

5. **QUALITY 质量**

5.1 **Qualification test 鉴定**

Samples must be in accordance with drawings and be taken in a random way in the production in progress.

样件必须与产品图纸一致，并且是生产过程中随机选取的。

5.2 **Requalification test 重新鉴定**

If changes significantly affecting form, fit, or function are made to the product or to the manufacturing process, product assurance shall coordinate requalification testing, consisting of all or part of the original testing sequence as determined by product engineering.

如果产品或者制造过程中有显著影响外观，装配和功能的设变，质保需要协调按照原先工程部定义的测试顺序，重新验证全部或者部分测试项目。

5.3 **Acceptance 验收**

Acceptance is based on verification that the product meets the requirements of section 4. Failures attributed to equipment, test setup, or operator deficiencies shall not disqualify the product. When product failure occurs, corrective action shall be taken and samples resubmitted for qualification. Testing to confirm corrective action is required before resubmitted.

归咎于测试设备，样件安装或者操作员的失误的失效不应判定产品不合格。当产品失效发生时，需要有纠正措施以及重新提交样件进行验证。在重新验证前，需确认已有纠正措施。

5.4 **Quality conformance inspection 质量合格检验**

The applicable TE Connectivity quality inspection plan will specify the sampling acceptable quality level to be used. Dimensional and functional requirements shall be in accordance with the applicable product drawing and this specification

TE Connectivity 的质量检验计划将指定适用的质量标准。尺寸和功能要求，应按照适用的产品图纸和本规范。
