

# HQ-005 series insert

#### 1. INTRODUCTION

#### 1.1 Purpose

This document provides the qualification summery of TE Connectivity HQ-005 series insert of HDC connector.

### 1.2 Scope

This specification covers the electrical, mechanical, and environmental performance of HQ-005 insert. Testing was performed at the Shanghai Electrical Components Test Laboratory.

#### 1.3 Conclusion

Based on the test results, all meet the requirements according to TE Connectivity Design Objectives 108-137054.

#### 1.4 Product Description

| Name        | Remarks |
|-------------|---------|
| HDC-HQ-005M |         |
| HDC-HQ-005F |         |

#### 1.5 Qualification Test Sequence

| Test and Examination                                   |            | Test Group |      |       |        |     |     |
|--|------------|------------|------|-------|--------|-----|-----|
|  |            | В          | С    | D     | Е      | F   | G   |
|  |            |            | Test | Seque | nce 1) | •   |     |
| Visual and dimensional examination                     | 1,6        | 1,5        | 1,3  | 1,11  | 1,3    | 1,8 | 1,6 |
| Durability of marking                                  | 2          |            |      |       |        |     |     |
| Polarisation and coding (If application)               | 3          |            |      |       |        |     |     |
| Pull out force of terminations for Crimped connections | <b>7</b> ª |            |      |       |        |     |     |
| Contact retention force in insert                      | 4          |            |      |       |        |     |     |
| Mechanical strength impact                             | 5          |            |      |       |        |     |     |
| Mechanical Operation (Durability)                      |            | 3          |      |       |        |     |     |
| Vibration, Random                                      |            |            |      |       |        |     | 3   |
| Shock  |            |            |      |       |        |     | 4   |
| Contact Resistance                                     |            | 2,4        |      | 2,8   |        | 2,5 | 2,5 |
| Temperature Rise Test                                  |            |            | 2    |       |        |     |     |

| Corrosion                                       |  | 7    |   |   |  |
| Protection against electric shock               |  |      | 2 |   |  |

#### \* Notes:

- 1) Numbers indicate the sequence in which the tests are performed.
- 2) a test items are for themselves separate tests and are performed on new specimens.

## 2. TEST PROCEDURE

| General |                                    |                                       |   |  |  |
|---------|------------------------------------|---------------------------------------|---|--|--|
| No.     | Description                        | Test procedure according              | Requirements  |  |  |
| 2.1     | Visual and dimensional examination | Meets requirements of product drawing | Visual and dimensional examination<br>IEC 60512-1-1/-2, Test 1a and 1b<br>6.2 of EN 61984 |  |  |

| Мес | Mechanical                           |  |  |  |  |  |
|-----|--------------------------------------|--|--|--|--|--|
| 2.2 | Durability of marking                | Marking shall be still readable according to 6.2 of EN61984 (If marking made by impression, molding, pressing or engraving or the like are not subjected to this test) | Test piston: Size 1 Wet test with liquid: water Duration: 10 cycles Force:5N IEC 60068-2-70 Test Xb, 7.3.2 of EN61984  |  |  |  |
| 2.3 | Polarisation and coding              | For multi-pole connector, require provision against incorrect mating according to 6.3 & 6.9.1 of EN 61984  No damage likely to impair function                         | For unenclosed connector (internal connections) 20N For enclosed connector (external connections) 1.5 x Mating force, but not higher than 80N Test 13e of IEC 60512-13-5 |  |  |  |
|     | Pull out force of terminations       | See 6.6 of EN 61984  | See 6.6 of EN 61984  |  |  |  |
| 2.4 | <sup>a</sup> for Crimped connections | The conductor shall not slip out of crimp barrel and pull out force as specified in Table 1 of EN 60352-2  | Visual tests on the crimp barrel and tensile strength test of the crimp connection as specified in IEC 60352-2.  |  |  |  |
| 2.5 | Contact retention force in insert    | No axial displacement likely to impair normal operation, min 50N force for each pin or socket, 6.18.2 of EN 61984  | Test load applied in axial direction, test speed:20mm/min, permissible shift contacts of 1.0mm, Test 15a of IEC 60512-15-1   |  |  |  |

| 2.6 | Mechanical<br>strength impact           | Connector and internal insulation shall no damage to impair normal use. A reduction of clearance and creepage distance is not allowed. 6.18.1 & 6.18.3 of EN 61984 | Dropping height: - 750mm for specimens of mass≤250g - 500mm for specimens of mass>250g Dropping cycles:8 positions in 45%tep, one cycles per position IEC 60512-7-2 Test 7b   |
|-----|---|--|---|
| 2.7 | Mechanical<br>Operation<br>(Durability) | 500 operation cycles without load<br>No damage likely to impair normal use<br>6.14.1 of EN 61984   | Shall be engaged and disengaged by means of A) a device simulating normal operating conditions at the speed of approximately 50mm/min B) manual mating/un-mating 300 Max. cycle per hour IEC 60512-9-1 Test 9a, 7.3.9 of EN 61984 |
| 2.8 | Vibration,<br>Random                    | No damage likely to impair function No discontinuities greater than t>1µs  | Frequency:5~150Hz Per EN 61373, Category 1, Class B (IEC60068-2-6 Test Fc)  |
| 2.9 | Shock                                   | No damage likely to impair function No discontinuities greater than t>1µs  | Acceleration:50m/s2 Duration:30ms Total 18 shocks(three positive and three negative in each of the three orthogonal axes), Per EN 61373   |

| Elec | Electrical                              |                            |  |   |  |  |  |
|------|---|----------------------------|--|---|--|--|--|
|      |   | Initial                    | Max.5mΩ  | Test current: 1A  |  |  |  |
| 2 10 | Contact<br>Resistance                   | Final                      | The change of contact resistance shall be no more than 50 % of the reference value or $\leq$ 5 m $\Omega$ . The higher value is permissible. | Measure pointsb at the end of the termination Max three contacts per specimen plus protective earthing, if any IEC 60512-2-2 Test 2b                |  |  |  |
| 2.11 | Temperature<br>Rise Test                | temperat                   | of the ambient temperature and the ure rise (△T) of a connector shall ed the upper limiting temperature N 61984                              | Length of test cable see table 7 of 7.3.8 of EN 61984 Carry its rated current Upper limiting temperature:125°C (Table 5b) IEC 60512-5-1 Test 5a     |  |  |  |
| 2.12 | Dielectric<br>Voltage<br>Withstand Test | No flasho<br>6.13 of E     | over or breakdown of voltage<br>N 61984  | Impulse test voltage according to Table 8, applied three impulses of each polarity and interval of at least 1s between impulses. 7.3.12 of EN 61984 |  |  |  |
| 2.13 | Insulation<br>Resistance                | Not less than $400M\Omega$ |  | Test voltage 1000V DC<br>Time:60s<br>IEC 60512-3-1 Test 3a Method B   |  |  |  |

| Env  | Environmental  |  |  |  |  |  |
|------|--|--|--|--|--|--|
| 2.14 | Cold   | No damage likely to impair function  | Subject mated specimen to -40°C Duration time:16h, Test Ab Per IEC 60512-11-10 Test 11j (IEC 60068-2-1)  |  |  |  |
| 2.15 | Dry Heat   | No damage likely to impair function  | Subject mated specimen to<br>+125°C Duration time:168h Test Bb<br>Per IEC 60512-11-9 Test 11i<br>(IEC 60068-2-2)   |  |  |  |
| 2.16 | Damp Heat, cyclic  | No damage likely to impair function  | Subject mated specimen to Min ambient temperature: 25°C Max ambient temperature: 45°C Number of cycles:21 Duration time:12h+12h Variant 1 IEC 60512-11-12 Test 11m                             |  |  |  |
| 2.17 | Rapid Change of<br>temperature<br>(Temperature<br>Cycle) | No damage likely to impair function  | Subject mated specimen to $Ta=-40\pm2^{\circ}C$ to $Tb=+125\pm2^{\circ}C$ , duration t1: 1h each extreme, 100 cycles IEC 60512-11-4 Test 11d (IEC 60068-2-14 Test Na)                          |  |  |  |
| 2.18 | Corrosion  | No damage likely to impair function  | Test 1: Flowing mixed gas corrosion according to test 11g, method 1 or method 4 (Table 1) Duration time: 4day (96h) IEC 60512-11-7 Test 11g 7.3.14 of EN 61984                                 |  |  |  |
| 2.10 | (Alternative)  | Per 6.21 of EN 61984   | Test 2: Sulphur dioxide test with general condensation of moisture according to EN ISO 6988  Duration time:24h (1 test cycle) 7.3.14 of EN 61984   |  |  |  |
| 2.19 | Protection<br>against electric<br>shock                  | no live parts shall be accessible by test finger, 6.4.2.2 or 6.4.2.3 of EN 61984 | Unenclosed connector. Test finger or 50mm sphere pressed with 20N against the surface as specified by the manufacture Mated specimen and socket connector (if application) 7.3.6.1 of EN 61984 |  |  |  |

<sup>&</sup>lt;sup>a</sup> test items are for themselves separate tests and are performed on new specimens.

<sup>&</sup>lt;sup>b</sup> measuring point: at the conductors as close as possible to the termination, if this is not possible, the conductor resistance shall be recalculated.

## 3. SUMMARY OF TEST RESULTS:

# Examination of product – all test group

| Test Group | Test Item  | Test Result  | Requirement  | Judgment |
|------------|--|--|--|----------|
|            | Visual and dimensional examination                     | No physical damage   | Meets requirements of product drawing  | passed   |
|            | Durability of marking                                  | Marking shall be readable  | Marking shall be readable  | passed   |
|            | Polarisation and coding                                | No physical damage   | require provision against incorrect mating   | passed   |
| Group A    | Contact retention force in insert                      | No axial displacement likely to impair normal operation                    | Axial displacement <1.0mm when test speed: 20mm/min, min 50N force for each pin or socket                                    | passed   |
|            | Mechanical strength impact                             | No physical damage   | No damage likely to impair function  | passed   |
|            | Visual and dimensional examination                     | No physical damage   | Meets requirements of product drawing  | passed   |
|            | Pull out force of terminations For crimped connections | 0.14mm <sup>2</sup> contact: 27.71N<br>4.0mm <sup>2</sup> contact: 337.37N | 0.14mm <sup>2</sup> : 18N Min<br>4.0mm <sup>2</sup> : 310N Min   | passed   |
|            | Visual and dimensional examination                     | No physical damage   | Meets requirements of product drawing  | passed   |
|            | Contact Resistance                                     | 1.85 mΩ Max.   | Max.5mΩ  | passed   |
|            | Mechanical Operation (Durability)                      | No physical damage   | After 500 operation cycles, No damage likely to impair normal use  | passed   |
| Group B    | Contact Resistance                                     | 2.21 mΩ Max.   | The change of contact resistance shall be no more than 50 % of the reference value or ≤5 mΩ. The higher value is permissible | passed   |
|            | Visual and dimensional examination                     | No physical damage   | Meets requirements of product drawing  | passed   |
|            | Visual and dimensional examination                     | No physical damage   | Meets requirements of product drawing  | passed   |
| Group C    | Temperature Rise Test                                  | 46.24 ℃  | The sum of the ambient temperature and the temperature rise≤125°C  | passed   |
|            | Visual and dimensional examination                     | No physical damage   | Meets requirements of product drawing  | passed   |
|            | Visual and dimensional examination                     | No physical damage   | Meets requirements of product drawing  | passed   |
|            | Contact Resistance                                     | 2.35 mΩ Max.   | Max.5mΩ  | passed   |
| Group D    | Dielectric Voltage Withstand Test                      | No physical damage   | No damage likely to impair function  | passed   |
|            | Insulation Resistance                                  | >1.90x10 <sup>10</sup> Ω   | Not less than<br>400MΩ   | passed   |
|            | Cold   | No physical damage   | No damage likely to impair function  | passed   |

|         | Dry Heat  | No physical damage         | No damage likely to impair function   | passed |
|---------|---|----------------------------|---|--------|
|         | Corrosion                                       | No physical damage         | No damage likely to impair function   | passed |
|         | Contact Resistance                              | 4.26 mΩ Max.               | The change of contact resistance shall be no more than 50 % of the reference value or ≤5 mΩ.  The higher value is permissible                         | passed |
|         | Dielectric Voltage Withstand Test               | No breakdown or flashover  | No breakdown or   | passed |
|         | Insulation Resistance                           | >1.06x10 <sup>10</sup> Ω   | flashover Not less than 400ΜΩ   | passed |
|         | Visual and dimensional examination              | No physical damage         | Meets requirements of product drawing   | passed |
|         | Visual and dimensional examination              | No physical damage         | Meets requirements of product drawing   | passed |
| Group E | Protection against electric shock               | No electric shock occurred | No electric shock   | passed |
|         | Visual and dimensional examination              | No physical damage         | Meets requirements of product drawing   | passed |
|         | Visual and dimensional examination              | No physical damage         | Meets requirements of product drawing   | passed |
|         | Contact Resistance                              | 2.14 mΩ Max.               | Max.5mΩ   | passed |
|         | Rapid Change of temperature (Temperature Cycle) | No physical damage         | No damage likely to impair function   | passed |
|         | Damp Heat, cyclic                               | No physical damage         | No damage likely to impair function   | passed |
| Group F | Contact Resistance                              | 2.75 mΩ Max.               | The change of contact resistance shall be no more than 50 % of the reference value or $\leqslant 5 \text{ m}\Omega$ . The higher value is permissible | passed |
|         | Dielectric Voltage Withstand Test               | No breakdown or flashover  | No breakdown or flashover   | passed |
|         | Insulation Resistance                           | >3.60x10 <sup>10</sup> Ω   | Not less than 400MΩ   | passed |
|         | Visual and dimensional examination              | No physical damage         | Meets requirements of product drawing   | passed |
|         | Visual and dimensional examination              | No physical damage         | Meets requirements of product drawing   | passed |
| Group G | Contact Resistance                              | 1.62 mΩ Max.               | Max.5mΩ   | passed |
|         | Vibration, Random                               | No breakdown or flashover  | No damage likely to impair function No discontinuities greater than t>1µs   | passed |
|         | Shock   | No breakdown or flashover  | No damage likely to impair function No discontinuities greater than t>1µs   | passed |

| Contact Resistance                 | 1.82 mΩ Max.       | The change of contact resistance shall be no more than 50 % of the reference value or ≤5 mΩ. The higher value is permissible | passed |
|------------------------------------|--------------------|--|--------|
| Visual and dimensional examination | No physical damage | Meets requirements of product drawing  | passed |
