

RELAY HOLDER MODULES

for the Automotive Industry

Our Relay Holders Gen2 are designed to meet automotive requirements for a number of switching and power applications using plug-in devices such as relays and flashers.

The products also comply with specifications for numerous truck, bus and off-road vehicle applications for convenience as well as in engine compartments.

They can be utilized as stand-alone components or combined with other fuse and relay modules from our broad product portfolio to create a complete hardwired power distribution system.
