HIGH SPEED COPPER CABLE

Our diverse portfolio of high speed copper cables for the air mobility vehicle market supports various data standards, architectural needs and are highly compatible with other TE contacts and connectors.

OPTICAL FLEX CIRCUITS

Fiber optic flex circuits offer both space savings and limited signal loss. The end result is multi-fiber connectivity that facilitates increased design flexibility.

MINI-ETH SINGLE PAIR ETHERNET

Today's air mobility vehicles require reliable, fast ethernet connectivity. Mini-ETH Single Pair Ethernet is available in 24 AWG & 26 AWG and works seamlessly with our Mini-ETH 369 connector to handle speeds of up to 100 MB/s.

UAVX CONNECTORS

UAVX HE connectors provide one of the smallest & lightest packages designed for three, five and six wire setups. Available in conductive black zinc nickel finish, these connectors are designed to perform in tough environments.

369 SHIELDED CONNECTORS

Engineered with space considerations in mind, TE's 369 Shielded Connectors boast a lightweight form factor design that allows for the tight mounting pitch of multiple connectors. Meets ARINC 854 Ethernet standards over 100BASE-T1.

QUICK INSTALL CONNECTORS

TE's high-speed ethernet modules are easily replaced for fast configurations, environmentally sealed and designed to be vibration resistant.

TOGETHER, EVTOL IS OURS
