

FOOD TECH FOR A BETTER TOMORROW

Verdical is changing the way we think about seed to table. Each indoor unit can produce up to 150 pounds of produce and herbs every year, providing a new way for restaurants to own the quality and variety of their crops. Explore how TE is partnering with entrepreneurs like Verdical and paving the way for this technological revolution.

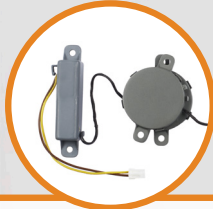

MAGNETIC POSITION SENSORS
Allow for proper alignment of plant column

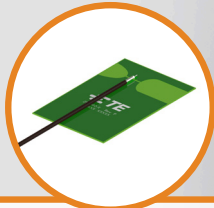

HUMIDITY/TEMPERATURE SENSORS
Monitor growing conditions

WATERPROOF CONNECTORS
Provides sealed, secure and reliable connections in small spaces

CONTACTLESS POWER
Allows for safe transfer of power and data in wet and humid environments

ANTENNAS
Allow for monitoring communications to be shared with smart devices

LIQUID LEVEL SENSORS
Measure water height
