

BIOGRAPHY

Alan Amici

Vice President and
Chief Technology Officer,
Transportation Solutions

Alan Amici serves as the Vice President and Chief Technology Officer for TE Connectivity's Transportation Solutions segment.

As the technical leader of the Transportation Solutions segment, Alan is responsible for the strategic direction of global engineering, technology, advanced development and innovation within the Automotive, Sensors, Application Tooling and Industrial & Commercial Transportation business units.

Alan joined TE after a 30-year career with Chrysler where he held a variety of global positions in engineering, manufacturing and service, including Head of Electrical and Electronics for Chrysler in Michigan, USA, Head of Electrical and Electronics for Fiat in Turin, Italy, Head of Global Uconnect and Global Service & Parts in Stuttgart, Germany.

Alan is the owner of two patents, is the recipient of the Walter P. Chrysler Technology Award and is a member of the SAE Convergence Technical Council where he served as the Technical Program Chair for Convergence.

Alan holds a Master of Business Administration degree, a Master of Science degree in Electrical Engineering and a Bachelor of Science degree in Electrical Engineering from the University of Michigan. He is also a graduate of the Chrysler Institute of Engineering.
