

BIOGRAPHY

Jean-Michel Renaudie

President,
Global Automotive

Jean-Michel Renaudie serves as President of Global Automotive for TE Connectivity. Global Automotive is a \$7 billion USD business that provides a wide range of connectivity solutions to original equipment manufacturers (OEMs) and their suppliers. These include cutting-edge solutions that enable customers to align their own solutions with megatrends, such as products for E-mobility, data connectivity and autonomy.

Jean-Michel joined TE in August 2020. Prior to assuming his current role, Jean-Michel served as Senior Vice President and General Manager for TE's Industrial and Commercial Transportation business unit, a multi-billion-dollar provider of advanced connectivity solutions for the truck, bus, construction, agriculture, recreation and marine vehicle markets. In that role, Jean-Michel oversaw extensive revenue and operating income growth and a significant increase in the company's customer base.

Jean-Michel has had a 25-year career in the Automotive industry, and prior to joining TE, he served as President and Executive Vice President for Faurecia Interiors, where he achieved 50% increase in sales driving annual revenue to \$6 billion. He also served as CEO of SAS, a joint venture between Conti and Faurecia, for three years. The company, with annual revenue of \$3 billion, specializes in cockpit engineering solutions and production

Jean-Michel is passionate about cutting-edge new technologies and at Faurecia, he led their most innovative division, developing pioneering solutions like the Cockpit of the Future, as well as advanced instrument and door panel systems, acoustic packages and display products. Jean-Michel brings a proven track record in leading profitable business growth. At Faurecia, he spearheaded the largest business development transaction for the Interior Systems division by acquiring Ford Interiors' operations. Over four years, he secured €2.5 billion in new business, increased sales fivefold in North America, and more than doubled the company's market share.

Jean-Michel holds a master's degree in Engineering and Industrial Management from Centrale/Supelec. He has extensive experience in line-level automotive components, systems, and modules, along with expertise in engineering, manufacturing, and strategic planning.
