PREMIUM QUALITY MANUFACTURING OF CRIMP CONNECTIONS
AMP 3K, 5K, GII AND GII+ TERMINATORS
GII Wire Processing Machine for Crimp Terminals

**Specifications**
Customer Manual - 409-32035

Crimp Force: 2268 kg [5000 lb] maximum crimp force capable of crimping 0.03–6.0 mm² [32-10 AWG]

Air: Pneumatic 620-760 kPa [90-100 psi] for models with air feed applicators and/or stripper module.

Electrical: 100-240 VAC, ± 10% AC, 50/60 Hz, Single phase. Operating current is 3 amps

*Note: Customer must supply power cord and final connection

**Safety first.**
Improved guarding on the Model G II terminator provides open access for quick and smooth installation of both end-feed and side-feed applicator styles and meets applicable CE and domestic safety requirements.

**Engineered with the operator in mind.**
The Model G II is one of the quietest terminators on the market. It features improved access to, and significantly updated lighting in the under cabinet and target areas, and includes a variable speed option which gives the operator more flexibility for those tricky applications that benefit from slower ram and feed speeds. And, with its tool-less changeover capability, setup is both quick and easy.

**Precision matters.**
All Model G II Terminator versions include precision adjustment for crimp height — an important feature, which, in combination with the optional Crimp Quality Monitor (CQM II), enables repeatable, tight crimp tolerances required for today’s demands for higher levels of quality. By simply resetting a dial, the operator can adjust crimp height in 0.013mm [.0005”] increments over a 0.457mm [.018”] range.

**Complete control.**
Our user-friendly LCD control panel includes simple button controls for: motor powering on and off, adjusting the ram speed, jogging the motor forward or in reverse, switching to split-cycle operation, work lighting, air feed, and batch counter reset. For improved quality, the controls also detect and report errors in the machine and stop cycling when a bad crimp is detected by the CQM II.

AMP-O-LECTRIC GII⁺ Terminator

Engineered for higher voltage applications.
The Model G II⁺ combines all the features of the popular GII line with the power to handle larger diameter wire sizes used for some high-voltage cable assemblies.

Complete control.
The user-friendly Crimp Quality II (CQM II) control panel includes simple button controls for: motor powering on and off, adjusting the ram speed, jogging the motor forward or in reverse, switching to split-cycle operation, work lighting, air feed, and batch counter reset. For improved quality, the controls also detect and report errors in the machine and stop cycling when a bad crimp is detected by the CQM II.

Precision matters.
All Model G II⁺ Terminators include precision adjustment for crimp height — an important feature, which, in combination with the optional CQM II, enables repeatable, tight crimp tolerances required for today’s demands for higher levels of quality. By simply resetting a dial, the operator can adjust crimp height in 0.013mm [0.0005"] increments over a 0.457mm [0.018"] range.

Engineered with the operator in mind.
The Model G II⁺ utilizes strong LED lighting in the under cabinet and target areas to improve operator visibility. The standard variable-speed option gives the operator more flexibility for those tricky applications that benefit from slower ram and feed speeds. And, with its tool-less changeover capability, setup is both quick and easy.

AMP 3K/40, 5K/30 & 5K/40 Terminators

Features
- Tool-less removal of applicators and guards for quick and simple maintenance and product change over
- Universal electrical input
- Quiet and fast operation

AMP 3K/40 and 5K/40 terminators use a DC motor with gearbox drive. The result is a small-footprint design that is fast and quiet.

Cycle time is less than 0.4 seconds with an operation sound level of 76 dB(A).

Standard features such as tool-less precision crimp height adjust, CQM capability, batch counter and a work light are integral parts of serial equipment. By offering options the AMP 5K/40 terminator can be tailored to the specific application requirements without inflating the price for unwanted features.

Tooling for processing larger wire sizes is available upon request.

The AMP 3K/40 5K/40 terminator is CE approved.

Specifications
Customer Manual: 409-10204

Crimp Force:
AMP 3K/40 max. 1.361 kg [3,000 lb] capable of crimping 0.03-2.5 mm² [32-14 AWG]
AMP 5K/40 max. 2.268 kg [5,000 lb] capable of crimping 0.03–6.0 mm² [32-10 AWG]

Cycle Time: Less than 0.4 seconds

Weight: 77.3 kg [170.4 lb]

Height: 585 mm [23 in.] without reel supports

Electrical Connection: 100-240 V, 50/60 Hz, single-phase
Operating current is 3 amps

*Note: Customer must supply power cord and final connection

Compressed Air: 620-760 kPa [90-100 psi], 2.83 l/s (6 scfm) (Please refer to application logs for specific air requirements)

Standard Equipment (5K/40 Models only)
- Tool-less precision crimp height adjustment
- Manual shut height adjustment
- Batch counter
- Work light
- CQM capability
- Tool-less removal/exchange of applicators
- Jog capability
- Assembled with metric hardware

Optional Equipment (5K/40 Models only)
- Pneumatic feed
- Crimp Quality Monitor (CQM II)
- Oiler kit

Premium Quality Manufacturing of Crimp Connections

AMP 5K/40 Terminators

Capacitive Start Sensor
A retrofittable capacitive start sensor is available for 5K/40 Terminators with stripping modules.

| Capacitive Start Sensor | 2844876-2 |

Short Strip Blades
Short strip blades for stripping down to 1.5MM strip length are available for 5K/40 Terminators with stripping modules.

| Short Strip Blades | 2217860-1 |

Optional Stripping Module

- For end- and side-feed applicators
- 3 modes of operation (Crimp only, strip only, or strip & crimp)
- Foot-switch or sensor activated
- Fast applicator changeover and easy adjustments
- Step mode for fast set-up
- Air blast ejects slugs into a collecting tray
- Compatible with crimp quality monitor

Optional Stripping Module

Defective Crimp Cut
With the help of our CQM II, defective crimp cut technology can immediately detect when a bad crimp occurs and cut off the crimped terminal to ensure bad crimps don’t accidently pass to the next step in your wire harness manufacturing.

Defective crimp cut enabled terminators are available on select 5K and GII terminators.

Documentation should indicate the proper break-out length depending on the applicator/terminal/wire gauge. An example for the MQS can be explained in the documentation as a reference (2151493).
Premium Quality Manufacturing of Crimp Connections

AMP 5K/30 & 5K/40 Terminators

Crimp Height Adjustment Using Precision Adjustment Mechanism

- Detent stops in the mechanism to adjust the crimp height
- Indexing the mechanism in either direction
- Change the crimp height in increments of approx. 0.013 mm [0.0005 in.] per step
- Electric located in the ram linkage

Adjust the crimp height by moving the precision adjustment lever
a.) To the right to increase the crimp height or
b.) To the left to decrease the crimp height

Gauges

Compatible with TE Connectivity and commercially available crimping presses, using quick changes style applicators.

Applicator Gauge
Ideal instrument to assure correct positioning of all TE applicators
- Connectivity applicators
- Simple installation and use

Alignment Gauge
528440-5
Premium Quality Manufacturing of Crimp Connections

AMP 5K/30 & 5K/40 Terminators

Control Panel

- Decrease Speed
  - Decreases the motor speed for normal cycle operation and for jogging
- Increase Speed
  - Increases the motor speed for normal cycle operation and for jogging
- Error Reset
  - Clears the displayed error code
- Count Reset
  - Clears the batch count to 0
- Jog
  - Causes the DC motor to rotate at the jog speed set by the increase/decrease speed

Base Plate

- The base plate with stripping unit as an option provides the mounting surface on which the applicator is installed.
- The applicator can be installed and removed with a long allen key.

Note: Some applications require the installation of an oversized guard kit 1976900-1. These applications are primarily ones that use two inch stroke air-feed cylinders.
Premium Quality Manufacturing of Crimp Connections

AMP 5K/30 & 5K/40 Terminators

Optional CQM II Crimp Quality Monitor

When used on TE terminators the CQM II provides a complete crimp detection analysis. It checks every crimp as it is produced, measuring crimp height of each termination and evaluating the quality of each crimp. If a crimp has questionable characteristics, visual and audible alarms alert the operator. The CQM II includes data ports for printing and networking.

CQM II offers five different crimp analysis methods.
- Crimp height
- Work index
- Peak force
- Fast Fourier Transform (FFT)
- Point-to-point

Features
- Best measurement to check compliance with crimp design
- Real time measurement during crimp cycle
- Inspects 100% of terminations
- Crimp height measurement accuracy: +/-0.012 mm
- Data can be saved to a USB flash drive
- 5 unique analysis methods capable of detecting most crimp faults.

Operation Setup of CQM
- Simple set-up and operation through task-bar selections.
- The system walks the user through all necessary tasks required to start production.

Premium Quality Manufacturing of Crimp Connections

Splice Terminator and Applicator

Applying thru-splices is fast and efficient when you have access to both sides of the applicator for placing and holding the wires.

The AMP 5K/40 splice terminator with a standard splice applicator provides front and rear access to maximize production efficiency. And it has full guarding for operator safety.

The splice terminator is offered in two versions, with and without crimp quality monitoring. Equipped with optional CQM II, force and position can be measured during every crimp cycle, providing real-time monitoring of crimp height, the fundamental crimp characteristic. The CQM II also monitors the shape of the work curve for every termination. Variations in the work curve may indicate improper wire placement, incorrect wire size, insulation in the wire barrel, tooling wear, etc. CQM II details and part numbers are shown on the other side of this sheet.

Like other AMP 5K/40 terminators, the splice version includes fine crimp height adjustment, full guarding with interlocks, and capabilities for jog operation. Splice terminators do not accept heavy-duty mini (HDM), heavy duty industrial (HDI) and OCEAN applicators.

Features
- Open access behind crimper maximizes production efficiency
- All the features of the proven AMP 5K/40 terminating machine
- Magnet-wire splice capability
- Crimp Quality Monitor II (CQM II) option
- Precision manual crimp height adjustment
- Low maintenance
- Standard 15/8 [41.3] stroke
- Manufactured under an ISO 9001 Certified Quality System
- Universal electric input 100/240 VAC, 50/60 Hz
- Customer Manual 409-10204

Capacity
Max. 2.268 kg [5.000 lb] crimp force capable of crimping 0.03–6.0 mm² [32-10 AWG]

Deflection
0.13 mm [.0046 in.] max. per 4,448 N [1,000 lb] crimp force

Noise Level
Less than 82 dB(A) typical at operator position with standard mechanical feed applicator

Weight
77.3 kg [170.4 lb]

Height
585 mm [23 in.] without reel supports

Electrical Connection
100-240 V, 50/60 Hz, single-phase current. *Note: Customer must supply power cord and final connection

Compressed Air
620-760 kPa [90-100 psi], 2.83 l/s (6 scfm)

Physical Environment:
Temperature: 4-40° C [40-104° F]
Relative Humidity: Less than 95% (non-condensing)
Premium Quality Manufacturing of Crimp Connections
