

# INNOVATIVE PRODUCTS FOR INDOOR LIGHTING APPLICATIONS

The global LED lighting market has grown 54% over the past year to \$25.4 billion, while at the same time the LED lighting penetration rate rose to 18.6%. TE is positioned as a leader in the design and development of LED interconnects and LED holders. We provide interconnect solutions for retrofit lamps, indoor fixtures, specialty lighting and lighting controls appropriate for use in a broad range of operating environments, from private offices, to retail and commercial indoor spaces.

With one of the largest connector portfolios on the market, TE offers a broad range of options to choose from to help accelerate your customer's path to market. Whether it's showing you our value-added solutions or designing a new product, our commitment to advanced engineering and world-class manufacturing delivers innovation to advance your lighting project.

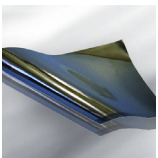

## HERMAPHRODITIC BLADE AND RECEPTACLE CONNECTORS

Offer low profile connectors that mate to themselves horizontally and vertically for lighting applications

## NECTOR M POWER SYSTEM

Offers a compact, easy to install, fully pluggable interconnect solution with low installation costs and a true plug-and-play interface

## PIEZO FILM SENSORS

Produce voltage or charge proportional to dynamic strain with piezoelectric fluoropolymer film
