## TE products and Safety Data Sheets

Dear Customer,

The vast majority of TE products are Articles. By definition, this means that they are not classified as dangerous products and that there is also no intended release of dangerous substances during normal conditions of use. Therefore, regulations<sup>1</sup> do not require Safety Data Sheets<sup>2</sup> for Articles.

For the limited number of TE products that do require a Safety Data Sheet, the available Safety Data Sheets can be obtained by using the Safety Data Sheet Search Tool in our Product Compliance Support Center.

Although most of our products are Articles and do not need a Safety Data Sheet, you can find all relevant part specific product environmental compliance information in our Statements of Compliance which are available for all TE products. Statements of Compliance can be obtained by using the Check Product Compliance Search Tool in our Product Compliance Support Center.

Our REACH obligation, as defined by Article 33 of the Regulation, to communicate REACH Substances of Very High Concern (SVHC) is fulfilled by our REACH Substance Communication Documents (RSCDs). If a Substance of Very High Concern is identified in any of our products above the threshold of 0.1% weight/weight, this information is included in our order confirmations and packaging slips. Those documents also contain a link to the website where the RSCDs may be obtained.

For our Safety Data Search Tool, for the Check Product Compliance Search Tool and for additional information regarding TE's Product Compliance initiatives, please visit our Product Compliance Support Center at <http://www.te.com/global-en/utilities/product-compliance.html>.
