This information is provided based on measurable inquiry of our suppliers and represents our current actual knowledge based on the information they provided. This information is subject to change.

The part number that TE has identified as EU RoHS compliant have a maximum concentration of 0.1% by weight in homogenous materials for lead, cadmium, and mercury, PBB, PBDE, DBP, BBP, DEHP, DpIP, and 0.01% for cadmium, or qualify for an exemption to these limits as defined in the Annexes of Directive 2011/65/EU (RoHS). Finished electrical and electronic equipment products will be CE marked as required by Directive 2011/65/EU. Components may not be CE marked.

Additionally, the part number that TE has identified as EU RoHS compliant have a maximum concentration of 0.1% by weight in homogenous materials for lead, cadmium, and mercury, and 0.01% for cadmium, or qualify for an exemption to these limits as defined in the Annexes of Directive 2011/65/EU (RoHS).

Regarding the REACH Regulations, TE’s information on SVHC in articles for this part number is still based on the European Chemical Agency (ECHA) Guidance on requirements for substances in articles (version 3, 3 April 2021), applying the 0.1% weight or weight concentration threshold at the finished product level. TE is aware of the European Court of Justice ruling of September 19th, 2019 also known as OMI (Driven for Analysis Of An Article) ruling that, in case of 'complex objects', the threshold for a SVHC must be applied to both the product as a whole and simultaneously to each of the articles forming part of its composition. TE has evaluated this ruling based on the new ECHA 'Guidance on requirements for substances in articles' (June 2017, version 4.1) and will be updating its statements accordingly.
