"I have previously purchased from other suppliers before and will never go back because of their service.

When I contacted their customer support after an operator jammed the machine, I was told to fill out a form and that they would get back to me in three days. Three days!

I need it working right now because I can't afford the production downtime as my customers are waiting on me to deliver. I like that I can call TE and they will send me somebody from down the street."
